ABSTRACT

Secondary students learn to deal objectively with domestic issues and problems in this quinmester elective course. Emphasis is upon providing students with an opportunity for indepth study in critical thinking on current controversial issues, using activity units as a principal teaching technique. The objectives are for students to identify and describe major issues in the problem areas of civil rights, crime control, preservation of the environment and natural resources, and over-population; state a value position regarding any given aspect of the problem; and present evidence to support the value position stated. The course is arranged as other quinmester courses with goals, content, activities, and resources sections. (SJM)

AN INTENSIVE STUDY OF SELECTED PROBLEMS IN AMERICA, SUCH AS POLLUTION, CIVIL COURSE DESCRIPTION:

RIGHTS, LAW AND CRDIM. NEWSPAPER OR PERIODICALS SÜRVH AS TEKTELORES FOR THIS COURSE. STUDENTS SHOULD DEVELOP THE ABILITY TO DEAL ORDECTIVELY WITH CURRENT

.USTER:

Americar Studies

COURSE STATUS

Elective

Previous Coursework in American History is Recommended. INDICATORS OF SUCCESS:

COURSE RATIONALE:

of the students' awareness of problems is a value position. The course is designed to improve the quality of the students' reactions to data presented by mass media A frequent by-product The eyes and ears of the emerging American Citizen (i.e. our students) are focused and to guide the process of value clarification concerning some of the most press-The initiator of first on this problem, then that one, then on still another. this bouncing focus of attention is usually the mass media. ing demestic problems.

cation will concentrate on having students verbalize the values they held concerning the problems studies, then gather and examine evidence to support their value position. The students should be to ht to use the evidence gathered to determine the consistency, appropriateness, and limitations of the value positions taken. identifying alternative sources of information. The efforts toward value clariff-The efforts to improve the "quality" of the students' reaction to data about current domestic problems will center around gathering and validating evidence and

problems, the ability to state a value position with supporting evidence, and an inclination to clarify values through inquiry as new problems are brought to their atneed to be aided in clarifying their values about the outstanding demestic problems of the current times. It is hoped that the final product (i.e. the gludents! "new" behavior) will reflect an awareness of the issues in some of the current domestic Since the students will live in a world where problems are constantly "reported," and comprehending such data. Since valuing is a natural hurin inclination, they they need to know more about the most common problems and gain skill in locating

(NOTE: The teacher's task, of course, is to ask questions that required the students to clarify their values rather than to chillenge the worth of the values. Only the students can decide the worth and usefulness of a particular value. Two given students may legitimately hold conflicting values about a problem. If the teacher can guide each student to identify evidence to support his position, then the students have better reasons to hold those values than they would otherwise and the techer has gone a long way toward succeeding at his main task: value clarification).

COURSE GOALS:

- FOR EACH OF THE FOLLOWING PROBLEM AREAS THE STUDENT WILL:
- DESCRIBE THE MAJOR ISSUE(S).
- STATE A VALUE POSITION REGARDING ANY GIVEN ASPECT OF THE PROBLEM. PRESENT EVIDENCE TO SUPPORT THE VALUE FOSITION STATED.

PROBLEM AREAS:

PRESERVATION OF NATURAL RESOURCES PRESERVATION OF THE ENVIRONMENT OVER-POPULATION CRIME CONTROL CIVIL RIGHTS

THE STUDENT WILL IDENTIFY CURRENT DOMESTIC PROBLEMS BY EXAMING NEWSPAPERS AND PERIODICALS. (NOTE: THE INTENT HERE IS TO ALLOW THE STUDENTS TO INVESTIGATE PROBLEMS OTHER THAN THOSF IDENTIFIED IN THE OBJECTIVE ABOVE).

ERIC Full Text Provided by ERIC

COUR'E CONTENT:

- I. Description of the Inquiry Process (e.g. use of evidence, objectivity, data gathering).
- II. Identification of Sources of Data (e.g. newspapers, magazines, radio and TV news).
- III. Clarification of Civil Rights Issues.
- .V. Clarification of the Issues in Crime Control.
- V. Clarification of the Issues Concerning Environmental Pollution.
- Clarification of the Issues Regarding Preservation of Natural Resources.
- Clarification of the Issues Relating to Excessive Population in America.
- Clarification and discussion of "Other" Problems (e.g. drugs, urban development, inflation).
- Statement of Value Positions; Gathering of Supportive Evidence.

ERIC Full Text Provided by ERIC

NOTE TO TEACHER:

The Teacher of this course is encouraged to examine the materials of the Harvard Social Studies Project on Public Issues. These materials were developed to support a social studies program with a major focus on current issues and would serve as an alternative plan for teaching this course or as a supplement to it. The project materials are published by American Education Publications. Particular attention is called to the explanatory booklet, Cases and Controversy and the main student booklet, Taking A Stand.

ERIC AFUIL TOXAL Provided by ERIC

FOR EACH OF THE FULLOWING FROM ENGINE ANGERT OF THE PROBLEM, AND C. PRESENT EVIDENCE TO SUPPORT THE VALUE POSITION STATED. GOAL 1:

LEARNING ACTIVITIFS	1. Have the students discuss and attempt to define the concept "civil rights." Consider having them read relevant portions of the U. S. Constitution as a starting point. A review of Supreme Court decisions relating to civil rights will also clarify the meaning of civil rights as now legally defined in America. (Have the students also identify are: in which civil rights are not clearly or consistently defined, e.g., right to public assistance ((welfare)), right to adequate medical care).	2. Have the students define discrimination and prejudice and distinguish between the two terms. Consider having them make-up situations to illustrate the distinctions.	3. Have the students survey current newspapers and periodicals for report of alleged or proved discrimination and/or prejudice. Exve them construct a list of the areas most commonly "making the news" because of discrimination or prejudice.	4. Have the students suggest reasons why legal efforts to protect civil rights focus on discrimination rather than prejudice. (Some interesting ideas about this area contained in Chapter 9 of Problems of Democracy by Dunwiddie and Kidger).	analyze the following statement: "Almost everyone belongs to some minority group so it is to everyones advantage to protect the rights of all minorities." Have them couplie a list of the rinority group: represented in the class (e.g., ternagers, Blacks, Southerners, Jews, Erthodists, short people, blue-eyed blondes, part-time employees). Have them survey current news-papers and periodicals to compile a list of minority groups who are "making the news" in regard to civil rights.	6. Have the students suggest ways an individual could be judged (evaluated) without concern over which minority groups he be-	
OBJECTIVE	A. The student will describe the major issues of the Civil Rights problem, state a value position regarding any given aspect of the problem and present evidence to support the value position of the problem and present evidence to support the value position.	sition taken.					1
FOCUS	CIVIL RIGHTS IN AMERICA						

	 211004

LEARNING ACTIVITIES

longs to (e.g., ability to perform a job, personality traits, actions). Have them discuss whether or not the ways they identify could be predicted by minority group membership. (Students should be expected to offer or gather evidence to support positions taken).

- missions involved in civil rights "work" by noting their names as they appear in the local newspapers. As such groups are identified, have the students conduct research (including perhaps inviting a speaker) to identify the history, purpose, membership characteristics, and actions of each.
- 8. Have the students identify ways in which the newspaper and periodical magazines contribute to the understanding and appreclation of minority groups.
- 9. Have the students construct and maintain a "cartoon-board," a bulletin board of current cartoons dealing with civil rights issues.
- O. Have the students review the movies playing at local theatres. Have them identify those which deal in some way with a civil rights theme. Students who have viewed the films might describe the position it takes for the class. (Any capecially worthy films can be the target of a field trip).
- l. Have the students consult recent census date for the portions of the population in various minority proups. Have the students determine what portion of the population are in the majority group of WASPs (and identify evidence to support or refute the proposition that the WASPs are, in reality, a coalition of minority groups).
- 12. Have the students discuss (to clarify the maning of) the gent-cralization that "all ren are entitled to equal protections

LEARNING ACTIVITIES	under law." Have them suggest what sort of attitudes and actions are required of a parson who believes this (e.g. opposition to discrimination, refusal to make judgements based on prejudice and stereotyping).	Have the students discuss the concept of "equal opportunity for employment." (possible focus questions: Does any person have a right to any job? What are good reasons for denying someone a job? Should prople doing the same work be paid the same and have the same rate of advancement?)	Have the students survey the local papers to 'entify the problems common to members of the 'Old Age' winority group. Have the students discuss to what degree these problems (e.g. medical care, housing, employment) relate to civil rights. (The intent here is to stimulate the students to gather evidence to aid in formulating a value position on the problems encountered by senior citizens).	Have the students discuss and attempt to define the term "crime." Have them establish criteria for distinguishing between crime and non-crime.	Give the students a list of actions some of which are serious crimes, some of which are minor crime, some of which are not crimes at all. (e.g. murder, running a stop light, smoking a cigaret, armed robbery). Have the students classify (i.e. group) the items in the list. After they have dene this, have them assign a label to each of their preups. The labels (i.e. perceptions) of the students should lead to an assign the the variety of ways to group crime as well as imprevious the rtudents ability to distinguish between crime and non-crime. (Possible student classifications include felonics, at dream sour, crime of violence, crime of decition). No itention aftens the grouping suggested by classic best for claif-fication as needed.
		13.	14.	.	5
OBJECTIVE			•	B. The student will des- cribe major issues in the crime control problem,	state a value position regarding any given aspect of the problem, present evidence to support the value position taken.

L VRNING ACTIVITIES	8. Have the students discuss the punishments and/or rehabilitations given to people convicted of crime. (Consider having them read "Back to the Woodshed?" by Judge Justine Polier, Public Affairs Pamphlet 232). Have the students describe episodes from their own experiences in which they received punishment and/or "rehabilitation" for a misdeed. Have them identify the benefits claimed for each approach.	9. Have the students view statistical data on the crime rate over the past twenty years. Have them make inferences on the changes in the rate (e.g. crime is increasing).	Have the students discuss (perhaps based on case studies presented by the instructor) the concept "juvenile delinquency." Once the concept has been clarified through discussion (and perhaps some research if necessary), have the students explain the significance of the following statement: "It is useless to try and help the delinquent child apart from the family that contributes so much to make him what he is!" Have the students formulate hypotheses about the role (influence) of the family (or social environment) in fostering criminal behavior. Have them conduct brief reviews of the literature (via "Reader's Guide") to test their hypotheses.	Have the students clarify the concept "secret society." Given the information that secret societies exist both to enforce and to break the law. (Be sure they can distinguish between "undercover agent" and "secret society"). Have them discurs the appropriateness of such societies (both law breaking and law enforcing) in a democratic nation. (NOTE: Some students may op-

pose secret secieties as being inherently incorpatible with deno-

cratic ideals and as uncontrollable. Others may support law en-

forcing secret societies on the grounds they meet a public need

and/or have a right to exist. Whatever the position taken, the teacher should question the students to establish clarity and consistency in each individual's peritien).

S

ERIC.	
LIUC	

LEARNING ACTIVITIES	. Have the students collect recent newspaper articles on conditions in local jails and prisons. Have them evaluate the effectiveness of such places as crime-control devices based on the available evidence. (The students might be encouraged to gather further data from a wider variety of sources).	. Have the students discuss the conflict between the rights of the individual and the effort to detect crime. Have them discuss such issues and search and seizure, wiretapping, "bugging" devices, and advisement or rights upon arrest and before questioning. (Among other sources useful excerpts on the topics above can be located in Crime and Justice in America).	Have the students do research to identify the pros and cons of firearms control (gun control legislation). (The instructor might select exceipts from literature available from the National al Rifle Association (con) and the National Crime Commission (pro). Have the students identify the reasons presented by the various "sides" of the dispute to justify their position.	Have the students discuss the significance (and perhaps conduct research to validate it) of this quotation by President Johnson: "It is violent crime that creates the climate of fear in the streets of our cities. But in economic terms, white collar crime - although much less visible - is considerably greate.
	12.		14.	15.
OBJECTIVE				
FOCUS				

Have the students gather data on this question. "Are the nation's law enforcement agencies adequate for the task they must accomplish?" Consider having the students formulate an hypothesis from the statement and seek evidence to test it.

The economic costs of crimes such as petty theft, consumer fraud, antitrust violations, and embezzlement dwarf all crimes

of violence."

LEARNING ACTIVITIES	Have the students gather data on the potential resources of the Oceans, especially food resources. Have them identify possible consequences if these resources are destroyed by man's pollution of the aquatic environment. Source: The Frail Ocean by Wasley Mark, New York: Ballantine, 1967.	Have the students discuss the concept "life-cycle." Have them identify the components in their own life cycle (e.g. food sources, oxygen producers). Have the speculate on possible consequences if various components of their life cycle were made scarce or destroyed (i.e. by pollution).	Discuss the concept "ecological system." Have the students do research to identify instances where an imbalance has occurred in an ecological system. Have them describe the effects of the imbalance.	Have the students collect newspaper articles on local pollution problems. They might locate the sources of pollution (locally) on a map and/or take a field trip to view the "data" for themselves.	Have the students discuss the economic effects of various industries and businesses changing their methods of operation in order to reduce or eliminate pollution. Consider having the students write to various business and industry leaders to ask for an explanation of the problems they face in ceasing to cause pollution.	Have the students discuss the concept "pollution." By means of discussion they should attempt to establish criteria by which to identify examples of pollution.	
OBJECTIVE	C. The student will describe the major issues in preserving the environment, state a value position regarding any given aspect of the problem, and present evidence to	tion taken. 2.	*	**		•	7
FOCUS	POLLUTION CONTROL						

8	
ERIC Full Text Provided by ERIC	

LEARNING ACTIVITIES	7. Have the students read chapter two, "The Tainted Sea," of The Frail Ocean by Wesley Eark. Have them identify the causes of Florida's "Red Tide," determine the effects and the reason for those effects (e.g. fish kills), and the significance of the "Red Tide" to man.	8. Have the students purchase a copy of The Environmental Handbook. Its collection of articles presents a well balanced statement of the conservationists position. It also contains information on how to "get involved." (NOTE: Chapter two, "The Tainted Sea," of The Frail Occan is reprinted in this book).	9. Have the students write to various conservation groups for data on the preservation of the environment. Some sources are listed below. Others can be found listed in The Environmental Handbook.	Scientist's Institute for Public Information 30 E. 68th Street New York, New York 10021	The Sierra Club 1050 Mills Tower San Francisco, California 94104	The Conservation Foundation 1250 Connecticut Avenue, N.W. Washington, D. C. 20036	10. Have the students write to the chairmen of the following House and Senate committees asking for an explanation of the role their committee plays in preservation of the environment. (They might also ask the chairmen to give their assessment of the statue of the environment "problem").

LEARNING ACTIVITIES	Have the students identify the natural resources upon which South Florida is dependent. For each of these have the students clarify the way(s) in which we are dependent upon those resources (e.g. clean air - economic dependency; water supply - survival, economic).	Have the students identify other areas of the country where the communities are dependent on the local supply of natural rescurces. Have them clarify the nature of the dependency in each case.	Have the students brainstorm to identify natural resources upon which the entire nation is dependent. Have them identify the source(s) of these natural resources and clarify why we are dependent on them (e.g. oil-economic, transportation, etc.).	Have students discuss the concept "prescrvation." Have them provide examples of things that are "preserved" (e.g. green beans, pickles, national monuments, museum items, hierlooms, family photographs). Have the students discuss why these things are preserved (e.g. limited supply, to meet juture needs, sentiment). From the reasons identified for preserving "things" ask the students which ones might also be good reasons for preserving natural resources. Consider having them make the reasons into hypotheses (e.g. Man needs to conserve his natural resources because there is a limited supply of them) that they can "test" as the course progresses.	Give the students this generalization: "A peoples' culture is a reflection of the natural resources available to them." Have them brainstorm to identify data to support or reject the proposition if applied to the United States.	Have the students conduct brief reviews of the literature to gather data of the historical development of the use of natural

Have the students identify the uses of such resources as tin, potash, nickel, and uranium. Have them locate the areas of the world that have the greatest supply of these minerals (e.g. tin-Malaya, Bolivia; potash- France, Germany; nickel-Canada; uranium-Contral Africa) and ourself the second of the second	these areas will be modified by the presence of resources we need. (This discussion should be followed by identifying the resources in which the U. S. has a near monopoly. Have the students discuss how rich supplies of useful natural resources affect political and economic relationships).	12. Have the students write to various national leaders and ask them their position of the preservation of natural resources. (If an election is eminent the students can review campaign literature and speeches to gather data on the position of such leaders).	13. Have the students read the ingredients and/or component parts from labels of various products. Have them discuss how they might discover what natural resources are used to produce the product and how they could learn if there is any need to limit the use of any of those resources. (They might write letters to request such data).	14. Have the students brainstorm to produce a list of reasons why competition for natural resources (among businesses or among nations) can cause tension and conflict. Have them formulate possible (hypothetical) solutions to the reasons identified. (This might be done by small groups).

OVER-POFULATION

FOCUS

LEARNING ACTIVITIES	people to explore for new supply or alternative vays to meet their needs.	1. Have the students read Thomas Robert Malthus' "An Essay on the Principle of Population" (located in Population, Evolution and Birth Control, G. Hardin, ed., as well as other scurces). Have them describe how Malthus compared the pattern of population growth to the probable standard of living of the people.	2. Have the students locate appropriate sources to gather data on the current rate of population growth for the United States (e.g. Vital Statistics of the U. S., Census Report). Have them compute probable population for Mami, for Florida, and for the United States at valious future dates (e.g. 1980, 2000, 2026, 2040). Have them suggest what effects such a growth in population might have on the areas in question.	3. Discuss the concept of "cumulative growth" of population. Have the student provide analogies of cumulative growth in areas other than population to demonstrate their understanding of the concept (e.g. An oak tree produces 5 fertile acorns from which flvc new oaks grow. Each in turn produces five more. You have a grove of 31 oak trees).	4. Have the students suggest possible criteria for deciding when an area's population is excessive. (e.g. limited arable land, limited supply of food, pressures of high density living, limited natural resources). For each of the suggestions, have the students seek data to determine if the problem factors are present in the United States at present or are likely to be present in their lifetime.	5. Have the students examine the concept of population density. Have them gather data about the density of population in serlected areas of this nation (e.g. Miami, the Northust, the

LEARNING ACTIVITIES	coastal states, the mountain regions). Have them describe the pattern of population density currently existing in this country and have them formulate hypotheses about the effect of this pattern on the creation of a population "problem."	6. Have the students examine statistical data on the distribution of the U. S. population by age. Have them make inferences about the significance of the data.	7. Have the students suggest factors (e.g. moral movement against birth control, legal limit on family size) that might change (accelerate or decrease) the annual rate growth. Have the students conduct research on the factors suggested (e.g. via the "Reader's Guide") to determine to what degree they are expected or promoted by citizen's organizations, government agencies, etc. (e.g. Population Zero).	8. Have the students suggest ways in which population becomes a factor in creating other domestic problems (e.g. allocation of natural resources, pollution control, urban housing). The them seek evidence to determine the degree to which excessive population effects other existing domestic problems.	9. Have the students discuss the possibility of an even distribution of population in the United States. Have them identify reasons why it is not a likely solution to present evercrowding in certain parts of the nation. (e.g. availability of jobs, transportation facilities).	10. Have the students discuss (to clarify) and locate sources of data for the birth rate and the death rate. Have them do research to determine the pattern of change these rates have shown in part decades (e.g. declining death rate). Have them make inferences about the effects of the patterns on population erowth.

LEARNING ACTIVITIES	Have the students compile an anotated bibliography of current documents, position papers, magazines articles, and books (paper and hard cover) relating to the population problem. (The "Reader's Guide," card catalogue, and publisher's cataloges are useful sources for obtaining the data). Once a substantial bibliography has been corpiled, have the students (individually or in small groups) classify (e.g. group) the sources. (Possible groups vight be birth centrol-pro, birth control-con, famine control, limited resources, social problems due to population density, etc. It is fraction that the goals of the course require that students toom their can opinion about the current demostic problems. Therefore, teacher manage ment should be designed to force student clarification of his position, not pressure to accept any particular position).	19. Have the students check local newspapers daily for articles related to population. A bulletin beard might be set aside for students to post such articles as they find shem. A review of the weeks "news" regarding population (and other problems considered in this course) right be made a regular part of the news. It would provide an excellent opportunity for student data gathering as well as interpretation of data.	20. Invite sprakers, show films, and/or listen to tages of people who can provide factual data and/or describe a coherent value position to the students.	21. Have the students construct a questionnaire on rarious aspects of the population problem. Have them administer it to family, friends, and neighbors. They can analyze the results to pain insight about both awareness of and value positions taken about population.	
OBJECTIVE					17
Focus					

GUAL 2: THE STUDENT WILL TUENTILL CONNENT BOLLOLLO INCUBLIC DI MARMINICI MASSIMENTE

LEARNING ACTIVITIES	The entactment of this objective is relatively simple. The students simply keep a list of the "issues" that make the news (e.g. newspaper, magazines, TV, radio). What to do with the list presents a variety of alternatives.	 Have the students discuss each problem to identify the issues (e.g. identify the components). 	2. Have the students select some of the problems identified as areas to investigate (in essence the students add more objectives to the course).	3. Have the students keep a record of which media reports on the problems identified. Have them note any variation in the emphasis each media gives to the issues. (They might check for such factors as which media tends to give the greatest depth of coverage, which the most accurate facts, which most often expresses an attitude or bias, etc.).	4. Have the students base independent study projects on the issues identified.	5. Keep a "current domestic problems" bulletin board for issues other than those covered by the course objectives.	6. Have small groups investigate (and perhaps report to the class) some of the problems identified. (Investigation here means defining the problem, identifying the issues, clarifying concepts, and locating the evidence that related to the problem).	
OBJECTIVE	The student will identify current domestic problems by examining newspapers and periodicals.							18

MATERIALS:

A. RECOMMENDED BASIC TEXTS:

Textual materials should be constructed by the students from newspapers, magazines, pamphlets, and other data sources relevant to current domestic problems.

B. RECOMMINDED TEACHER REFERENCES:

The following books are useful sources of techniques for teaching a class on domestic problems.

Bailey, Stephen, et. al. Contemporary Issues in American Democracy. New York: McGraw-Hill, 1969.

Dunwiddie, William and Kidger, Horacc. Problems of Democracy. Boston: Ginn & Co., 1962,

McCutchen, Samuel, George Fersh, and Nadine Clark. Goals of Democracy: A Problems Approach. York: MacMillan, 1962.

Columbus, Ohio: American Oliver, Donald W. and Newmann, Fred M., eds. Cases and Controversy. Education Publications, 1970.

Boston: Allyn and Bacon, Inc., 1962, Pullen, Charles and Reed, James. Today's Problems.

Walker, Edward, Olis Jamison, and John Carroll. Understanding Our Times. Syracuse, New York: L. W. Singer Co., 1961.

C. ALTERNATIVE STUDENT AND CLASS RESOURCES:

1, Audio-Visual Sources:

of film distributors who handle the most up-to-date films and other audio-visual materials relevant to studies of current domestic problems is presented. The instructor is urged to write to justify the effort to find out what is available. The students may wish to "finance" their own Due to the "current" aspect of this course, no specific films are recommended. Instead a list each of these organizations, describe the needs of your students, and request a listing of ap-(NOTE: Fees are greatly low enough to film rental(s) if school funds are difficult to obtain). propriate materials available from the distributor.

Audio-Visual Center, Indiana University, Bloomington, Indiana, 47401.

British Broadcasting Company, c/o Peter Robeck & Co., 230 Park Avenue, New York, New York 10017.
